Ever since it was established in the city of Čakovec by Ksenija Vrbanić in 1986, XD XENIA DESIGN has been at the forefront of Croatian as well as global fashion. Through innovative and unconventional construction, combined with an exclusive and unique style that bases its design around specific personalities, this brand takes classic tailoring to a new dimension, to the XD DIMENSION. This one-of-a-kind dimension brings cutting-edge production methods to traditional designer authorship collections, and thus pioneers a new way of fashion that focuses on expressing skilfulness, launching trends and permanent changes. Sustainable and transparent made clothing with confidence and femininity.

Because of this unconventional approach to fashion, XD XENIA DESIGN, whose collections have been exclusively produced in Croatia ever since the brand was established, became an important part of all major events happening on the international fashion scene – and a leading Croatian fashion studio at the same time.

As one of the pioneers of Croatian fashion avant-garde, XD XENIA DESIGN has never been the one to follow global trends, striving to create its own individual and innovative aesthetic instead. This willingness to create its own path, rather than following a well-established one, made XD XENIA DESIGN a household name with more than 350 stores around the globe today.
